

Accessories:

	7905	PLUS PACK 2pcs 990 1pc 980 1pc 970		970	IR detector Coverage approximately 12m. temp. Temperature range -10 to +50 degrees. Battery life about 1.5 years
	8626	Socket / remote switch Range about 30 meters HE-35 Load: max 3500 W		960	Optical fire/smoke alarms Temperature range -5 to +50 degrees. Battery life approximately 1 year
	980	Magnetic Contact: battery will last about 1 year 7679, 7795 and 7796 goes wireless in combination with this wireless magnetic contact.		990	Remote Control. 6 buttons for battery life about 1.5 years
	8529	CMR-1000. For installation mounting wall box / central.		7912	Temperature sensor Wireless
	8522	Wireless relay: 12/15A and 24/7A VDC. Motorhome or similar. CMR 1224		7795, 17 x 60cm 7796, 36 X 60cm Press / foot mat	Waterproof (IP 67) with loose wiring for connection (NO). see 980
	8542	Temperature sensor for outdoor use. Range -30 To +50 degrees		7397	Solves most problems with reception
	7679	Water level sensor Waterproof (IP 67) with loose wiring for Connection (NC). see 980		7437	Wall-mounted outdoor / indoor antenna GSM 900/1800

Intertechno/Nexa products with coding wheel are fully compatible.

Delivery comprises:	
Part number	7900
Heat-Link	1pc.
Charger	1 pc.
Battery	1 pc. (built in)
Remote switch	1 pc. 3500W

HEAT-LINK

A warm welcome!
Comfortable– Safe – Economical!

**Control the temperature and protect
your cottage, camper etc!**

 **Developed and produced in Sweden by**
HELLMERTZ elektronik ab
Electronics since 1976!

HEAT-LINK A22+

Data:	
Article number	7900
Type of telephone	GSM 900/1800
Sim card	Standard
Voltage	220 VAC to 12 VDC
Power Consumption	< 20 mA In average
Thermostat	Built in with frost guard
Number of wireless outputs	8 pc. channels with wireless remote switch
Number of inputs	1 for outside temp. reading
Wireless inputs	6 pcs for detectors/sensors
LED indication	1 pc. GSM Active
ON/AUTO/OFF button	1 pc. Heat Active
Battery	> 24 hours emergency
Measurements (without antenna)	170 x 70 x 20 (WxHxD) mm

Remote control heating /cooling for homes, RV, boats, etc.

Arrive at a heated cabin, avoid cracked pipes, start the water pump, ignition light, etc. Saves energy!!

With one SMS, you can have full control over heating your house!

Easily control channels: E.g.

When the indoor temperature of your cabin reaches +4 degrees C a frost alarm is set off, turning on maintenance heat that you previously set at +10 degrees. Two weeks later, on your way up to the cabin you send an SMS that that increases the heat to the pre-set comfort temperature that you have set to +20 degrees. As you approach, you choose to even turn on the sauna and the lights.

Wireless alarm.

Feel secure with the help of a large number of wireless devices such as; infrared detectors, door contacts, smoke detectors, temperature sensors, remote control with emergency button.

Plug & Play installation.

For normal operation when the heating is connected to the power outlet, you can install Heat-Link yourself. When using fixed wireless on / off an electrician is required to install it to the underfloor heating or fuse box.

HEAT-LINK

- ❄️ Control 8 channels with wireless remote switch. Check the guest house / kitchen / sauna room / bedroom, etc. separately.
- ❄️ Each channel can have multiple sockets. You can have as many remote switches as you like per channel!
- ❄️ Automatic frost warning. Avoid frozen pipes. Just turn on the heat when and where needed.
- ❄️ Ready for wireless intruder alarm and fire warning. Up to 5 pcs. remote controls (on/off, emergency button) 6 pcs. devices such as: wireless - infrared detectors, magnetic contacts, -smoke detectors, temperature sensors
- ❄️ SMS alarms up to 8 numbers. E.g. yourself, emergency service centre etc.
- ❄️ Built-in battery. Early warning to avoid damage to house and property in case of power loss. It will work even if power is lost for more than 24 hours.
- ❄️ Measure temperature. Get Info. about the current indoor and outdoor temperature.
- ❄️ All the settings via SMS, App or Internet.
